JCI-PSA-2021-22
CVE-2021-36198
ICSA-21-336-02

Overview

Johnson Controls has confirmed a vulnerability impacting Kantech Entrypass security management software. Users should upgrade to version 8.40 to ensure the relocation or deletion of reports present in the public folder.

Impact

Successful exploitation of this vulnerability could allow an unauthorized user to access sensitive data.

Affected Versions

- All versions of Entrypass prior to version 8.40.

Mitigation

- Upgrade Entrypass to version 8.40.
