

Product Security Advisory

June 14, 2022

JCI-PSA-2022-10
CVE-2022-21935
CVE-2022-21937
CVE-2022-21938
ICSA-22-165-01

Overview

Johnson Controls has confirmed one or more vulnerabilities impacting Metasys ADS/ADX/OAS Servers.

Impact

Under certain circumstances, unauthorized users could potentially:

- perform password guessing attacks at a high rate;
- inject malicious code into the web interface and have it stored for later use; and/or
- inject malicious code into the Draft Graphics (MUI Graphics) web interface and have it stored for later use.

Affected Versions

- All Metasys ADS/ADX/OAS 10 and 11 versions.

Mitigation

- Update all Metasys ADS/ADX/OAS 10 versions with patch 10.1.5.
- Update all Metasys ADS/ADX/OAS 11 versions with patch 11.0.2.
